Education

PES University

June 2024

B.Tech in Computer Science and Engineering (GPA: 8.46 / 10.00)

Bengaluru, India

- **Relevant Coursework:** DSA, Web Technologies, Computer Networks, Operating Systems, DBMS, Machine Learning, IoT, Cloud Computing, Statistics for Data Science
- **Specialization Certificate in Network and Cyber Security:** Computer Network Security, Information Security, Digital Forensics and Ethical Hacking

Experience

Subex

Jan 2024 – July 2024

Software Engineer Intern

Bengaluru, India

- Developed **Bash scripts** to automate **CI/CD** workflows including branch creation, Jenkins build triggering, library version updates, build tag & Helm chart extraction, branch cleanup, and ArgoCD deployments, reducing manual effort by 70% and saving several hours during each release cycle.

Flexera

July 2024 – Current

Associate Software Engineer

Bengaluru, India

- Built end-to-end **SaaS data connectors** for **DocuSign, Box, Smartsheet, Lucidchart, ServiceNow, and Trello**, handling API integration, storage layer design, pagination, and large-scale user ingestion (10k+ users).
- Designed and implemented a **Multi-Purchase and Tiers system** for SaaS subscription management, building **RESTful CRUD APIs** with currency conversion, cascading deletion across tenants/subscriptions, and event-driven processing via **NATS**, using **Go, MongoDB, and OpenAPI**
- Engineered an **overlapping subscription assignment** system for **ServiceNow** connectors, implementing automated user-to-subscription mapping, ambiguous user export, KPI-based subscription count APIs, and **role-based subscription assignment**. Resolved critical production issues including **incorrect allocated counts, use verification data inaccuracies**, and **custom field export fixes**, ensuring accurate license management for enterprise customers.
- Led **Azure Australia region migration**, upgraded all the microservices to **EventBus V3** with TLS configuration, and patched a critical **OpenTelemetry Go SDK** arbitrary code execution vulnerability — strengthening platform security and multi-region compliance.

Projects

Automated News Post Creation Agent | React.js, TypeScript, GitHub Copilot, Atlassian Roov, Jira, Confluence

- Built an AI-driven agent integrating **Confluence, Jira, and GitHub custom agents** to automate feature release note creation enabling technical writers to generate content without reviewing full documentation and developers to produce production-ready UI code from approved content, reducing the end-to-end news post creation effort and turnaround time by 95%

Figma-UI-Generator Agent | React.js, TypeScript, Figma MCP, Code Connect, GHCP

- Built an AI-powered **Figma-to-code agent** achieving 80% code generation accuracy, reducing UI development effort by 60–70% through automated conversion of Figma designs into production-ready React/TypeScript components.
- Integrated the agent with a 70+ component design system and implemented intelligent code pattern discovery, enabling consistent, reusable, and standards-compliant UI generation across new features, enhancements, and bug fixes.

Redefining Dental Radiology using Deep Learning | YOLOv7, YOLOv8, Python, Roboflow, Jupyter

- Contributed to an IEEE-published **Deep Learning** research project on dental radiology using **YOLO**-based models for AI-driven image detection and diagnostic analysis; presented at the 2nd World Conference on Communication & Computing (WCONF), RAIPUR, India, 2024

Technical Skills

Languages: Go, Java, Python, SQL

Technologies: MongoDB, MySQL, HTML, CSS, git, React.js, Figma, AWS, Github Copilot, GenAI, Agentic AI

CI/CD tools: Jira, Confluence, Github, Github Actions, SonarQube, Docker, ArgoCD, Kubernetes

Concepts: Prompt Engineering, Agile Methodology, Security, Artificial Intelligence, Machine Learning, Database Normalization
